Summary

I'm an experienced Full Stack Developer with 2 years of experience in React.js and Next.js. Skilled in Typescript, Tailwind CSS, and Material UI for front end, with strong backend skills in API development. Proficient in client - side scripting, cross - browser compatibility, writing reusable code. Eager to build scalable and innovative web applications.

Projects

GlassAura - Figma Plugin

GlassAura - Glassmorphism Create Amazing Glass Effects with Ease
GlassAura allows designers to create glass effects for both light and dark them backgrounds.
It is an amazing plugin with convenient user experience and ease to craft glassmorphism, fun in hands.

E-commerce Store

E - commerce store developed in MERN stack developer.
This store has CRUD functionalities for handling products and blogs.
This app allows for special admin access, which directs admin to dashboard for handling store.

Resume Builder

Resume Builder is an windows application developed in Visual Studio using .NET framework. It was our 6th semester project, where we used C# programming language to develop resume builder. It allows user to create resume with just filling the forms and completing apps requirement to generate resume. The user is able to download resume in pdf.

Student Course Registration System

SCRS - Student Course Registration System was another project developed in C# programming language, in .NET framework. We implemented this project using 3 Layered Architecture. Development of this project provides a lot of experience and learning in full stack application, where we implement from database to front end and back end.

Experience

Web Developer
